eCourseware (LMS) plugin that enables faculty to link UofM-owned readings directly into individual modules. Pulls from the EBSCO Discovery Service, which is more robust than Google Scholar.

On the faculty-end, faculty will be able to link to full text materials from a multitude of databases (CINAHL Complete, Education Full Text, ERIC, Business Source Premier, IEEE, JSTOR, and so many more).

Potential timeline:
- Libraries will purchase for Spring pilot in collaboration with TLAC.
- Pilot/refine service for Summer/Fall rollout.
- Librarians will provide robust training materials (videos, live sessions, in-person workshops, handouts) and support alongside ITS documentation.

Benefits for Faculty:
- Maintain currency of readings
- Potential to embed eBooks, PDFs, text-to-speech, .mp4, primary sources, scholarly journal articles
  - Lower barrier to access for student success
  - OER options
- Easily search for and link readings
  - Avoid copyright infringement

Benefits for Library:
- Able to see real usage statistics for materials faculty use in courses.
  - Show real value to maintain/expand eResources for UofM.
- Work in tandem with faculty to provide useful materials for student success.
